

TWENTY YEARS OF ORTHODONTICS – 1996-2016

Pontifícia Universidade Católica do Paraná (PUCPR)

The Orthodontics of PUCPR works focussed on teaching and orthodontic training grounded in evidence-based diagnosis, which allows practice and the seeking of excellence with any orthodontic techniques of yesterday or today; and connected with those yet to come for the correction of malocclusions.

With quality, credibility and plurality.

In order to accompany the latest developments in the orthodontic world, the Orthodontics of PUCPR is in constant movement, because, as François de la Rochefoucauld said, "the only thing constant in life is change"

Since the beginning, it has been ideas, work, discipline and action that have made us move forward and progress.

The Orthodontic at PUCPR has a long history of commitment to its students (undergraduates, those undertaking specialization, Master's Degrees and Doctorates) over these last twenty years...

In 2016, at the 7th Meeting, on the 18th and 19th of August, come celebrate with us a great success story, at the 20th anniversary of Orthodontics at PUCPR.
